DATA CENTER

Dedicated Team

EDS specializes in architecting data centers for optimal performance, simplicity, and efficiency with a dedicated team of experts. Design your data center for resilient operations with EDS.

JOIN

ADVISORY

Our consultants are highly skilled professionals.

Connect with EDS today to take your business to the next level by providing support for your existing and new design projects. Everyone, Everywhere.

BROWSE

MANAGEMENT

Project Management & Leadership services

We ensure that our clients' projects are completed promptly, within budget, and up to the necessary quality standards, without making any concessions.

SEE HOW

Data Centre Design Services

Engineering Design Service

EDS provides a variety of design services, consultancy, and support for data centre design. If you're aiming to create a high quality, cost effective data centre, we would love to hear from you!

SERVICES

Feasibility / Test Fit
Electrical Engineering
Mechanical Engineering
Public Health Engineering
Fit-Out Design
BMS Design
Fit-out design
Fire Alarm Systems Design
Design Review

Design Phases

Engineering Design Service

EDS offer comprehensive engineering and design services essential for executing projects across its various sectors. Each project is distinct, with specific needs tailored to the client, industry, and location. Thanks to EDS's regional footprint and extensive experience, they can thoroughly understand the services required. Effective design and planning stem from a meticulously organized engineering and design process. The coordination of interdisciplinary interfaces is crucial, and EDS conducts interdisciplinary reviews to guarantee high-quality engineering and design. Additionally, EDS can assist with obtaining all necessary permits for a project if required.

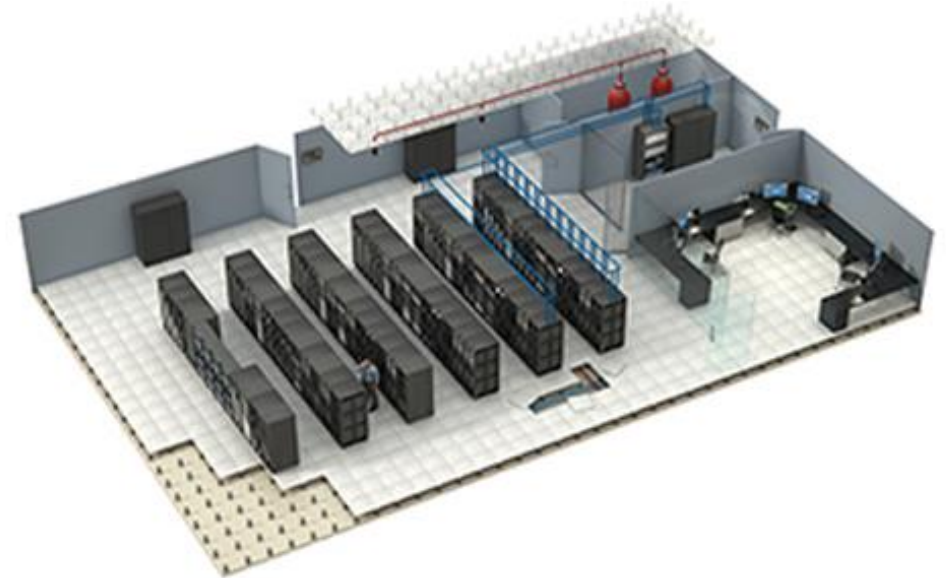

SERVICES

- Pre concept
- Concept Design
- Tender Design
- Detailed Design
- Design Review
- Local Code Compliance
- Fit-out design
- RIBA Stage 2-5
- Construction Design

Technical Consulting

Engineering Design Service

A fundamental engineering design consultancy that possesses specialized knowledge spanning advisory services, multiple phases of design, construction assistance, and commissioning. We engage in collaboration with clients, design team, developers and primary contractors to achieve the delivery of high performance and sustainable structures.

SERVICES

- High Voltage/Medium Voltage and Power Systems Advisory Services
- Lighting Advisory Services
- Chilled Water Systems Advisory Services
- Heating Systems Advisory Services
- Procurement (Owner-Furnished, Contractor-Installed) Equipment Advisory Services
- Local Code Compliance Advisory Services
- Design Assistance Advisory Services
- Value Engineering Advisory Services
- Single Point of Failure (SPDF) Advisory Services

Project Management

Engineering Design Service

Effective project management is essential for achieving objectives related to time, quality, and budget constraints. EDS possesses extensive experience in the planning and implementation of large-scale, interdisciplinary initiatives. Leveraging this expertise, EDS is well-equipped to undertake project management roles as the primary consultant. The overall efficiency and quality of project execution can be greatly enhanced by optimizing management responsibilities. Should the client require, EDS is prepared to take on complete responsibility for project management.

SERVICES

- Project Organization
- Project Management Consultancy
- Risk Management
- Stakeholder Management
- Project Execution Planning
- Procurement Services
- Supply Chain Management
- Construction Supervision
- Commissioning Supervision
- Operation Supervision
